DETAILED ACTION

Reasons for Allowance

Claim 5 is allowed. The following is a statement of reasons for the indication of allowable subject matter. Prior art teaches the optical switching network having the first and second switching parts connected by optical fibers and optical path switching elements *except for* the optical path length from the input port to the output port being substantially the same. This is attributed to the staggered optical switching elements positioning by the Applicant. In contrast, prior art teaches that the optical path length measured from, for example, the first input port to the first or fourth output port would be substantially different. It is the examiner's opinion that the prior art of record, taken alone or in combination, fails to disclose or render obvious in combination with the rest of the limitations of the base claim.

Claims 8 and 11 are allowed. Suemura et al. teach the optical switching network having the first and second switching parts connected by optical fibers and optical path switching elements except for the optical path switching parts comprising planar waveguide having input ports, coupling ports, reflection mirrors inserted respectively in trenches and actuators driving the respective reflection mirrors. Since Suemura teaches the input and coupling ports to be physically separated from the optical switching elements, and combination or modification thereof would destroy the Suemura reference. It is thus the examiner's opinion that the prior art of record, taken alone or in combination, fails to disclose or render obvious in combination with the rest of the limitations of the base claim.

Claims 9 and 10 are allowed by virtue of being dependent upon allowed claims.

Application/Control Number: 10/790,020 Page 3

Art Unit: 2883

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charlie Peng whose telephone number is (571) 272-2177. The examiner can normally be reached on 9 am - 6 pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font can be reached on (571) 272-2415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
